# HTET WAI YAN

## Full Stack Developer

+66628152947 hwy.dev@gmail.com www.linkedin.com/in/htet-waiyan www.htetwaiyan.com

Chiang Mai, Thailand

## SUMMARY

Full-stack developer with over 5 years of experience delivering scalable web applications using Angular, React, and Node.js. Skilled in integrating cloud services and secure payment systems, with proven success managing projects serving thousands of users daily. Adept at leading teams and optimizing CI/CD pipelines to ensure high-quality, rapid deployment and enhanced user experience.

## EXPERIENCE

### Frontend Developer (Freelance)

2026-June - 2026-Aug

**Iron Software**

Remote

- Migrated legacy PHP-based websites to Astro, preserving pixel-perfect designs across localized product pages.
- Refactored legacy CSS and hardcoded content into Tailwind CSS and JSON-based localization to improve maintainability and consistency.
- Optimized website performance and Core Web Vitals, focusing on page load speed, rendering performance, and responsive user experience.
- Performed UI QA and cross-page consistency checks, resolving visual issues and implementing feedback across localized product pages.

### Full Stack Developer (Freelance)

2024-Feb - 2026-May

**Win Intelligence Software Ltd**

Remote

- Developed and maintained a multi-tenant backoffice platform supporting multiple customers, with each tenant isolated using its own database schema.
- Built and maintained an e-commerce platform for businesses to manage online storefronts, products, orders, and checkout workflows.
- Integrated secure payment solutions, including Adyen and Saferpay, and developed CI/CD pipelines using AWS CloudFormation, CodeCommit, and CircleCI.
- Developed backend services using Node.js and Express.js, leveraging AWS for cloud infrastructure and services.
- Collaborated with cross-functional teams through code reviews and software development best practices to deliver reliable web applications.

### Full Stack Developer

2023 - 2024

**TASTYSOFT Software Outsourcing Co., Ltd (partnership with Myanmar Information Technology Co., Ltd)**

On-site

- Developed and maintained production web applications using Angular and Python, supporting projects with 3K+ daily active users.
- Led a team of 4 through daily standups, task assignments, and progress tracking to ensure timely delivery.
- Collaborated with the Product Owner on requirements and feature planning through weekly meetings.
- Conducted weekly code reviews and helped maintain code quality and development standards.
- Identified project bottlenecks and coordinated with team members to resolve delivery and technical issues.

### Junior Full Stack Developer

2020 - 2023

**TASTYSOFT Software Outsourcing Co., Ltd (partnership with Myanmar Information Technology Co., Ltd)**

On-site

- Developed and maintained a Learning Platform and Human Resource Management System using Angular.
- Deployed and monitored web applications using AWS and DigitalOcean.
- Collaborated with the team lead on UI/UX design and implementation.
- Developed and tested web application features, fixing bugs and improving reliability.
- Collaborated with backend developers on database design and integration.

## PROJECTS

### Triggr

github.com/HtetWaiYann/workflow-builder

A visual, node-based workflow builder that lets users design, configure, and run automation workflows through a drag-and-drop canvas — no code required.

- Drag-and-drop canvas with trigger, HTTP request, transformer, condition, delay, and output nodes.
- Real-time per-node execution status, execution history, and template interpolation across upstream outputs.
- REST API and scheduled (cron) triggers backed by BullMQ + Redis, with AES-256-GCM encrypted workspace variables.
- Built with React 19, React Flow, Zustand, and Tailwind on the frontend; Node.js, Express, Prisma, and PostgreSQL on the backend.

### Relax

relax.htetwaiyan.com

Relax is a torrent streaming for movies and series. It is a personal project, built for my own use — not a product, not something I expect anyone else to run. It exists mostly as an excuse to design a real cross-runtime desktop app end to end.

- Desktop streaming app for movie geeks
- The architecture is what I care about here — the contract-first boundary, the locked-down Electron layer, the interface-driven backend

### ATS-Ready Resume

resume.htetwaiyan.com

Browser-based resume editor with drag-and-drop section reordering, live preview, and true vector PDF export with working clickable links.

- Multiple ATS-friendly templates that you can customize to match your style and make your resume stand out
- A quick sanity check for the basics — contact info, standard sections, dates, quantified bullets, machine-readable format
- Edit, import, and export entirely in your browser with no account or server required, keeping your resume data on your device

## CERTIFICATIONS

### AWS Certified Cloud Practitioner

Amazon Web Services (AWS)

### AI Programming with Python Nanodegree

Udacity

## SKILLS

**Front-end frameworks**

Angular, Svelte, React, Next.js, Vue.js

### Back-end technologies

Node.js, Express.js

### Web development languages

HTML, CSS, JavaScript, TypeScript

### Databases

MySQL, PostgreSQL, MongoDB, DynamoDB

### Cloud services

AWS, Digital Ocean

### AI-Assistant Development Tools

Claude Code CLI, Codex, Cursor

## EDUCATION

### Bachelor of Science (Hons) in Computing

12/2024 - 12/2025

**University of Greenwich**

Remote

### Associate Degree of Science

11/2021 - 12/2023

**University of the People**

Remote
